

TerraDeck™ Ultimate Co-Ex Deck Board

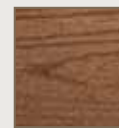

TerraDeck Ultimate Co-Ex Deck Board:

- Core made with 100% recycled wheat straw cellulose and 100% recycled HDPE (milk jugs)
- Cap made with propriety hybrid blend of HDPE/advanced engineered polymers
 - Matte Finish
 - Hard Surface
 - Class B Fire Rating
- Available in 3 variegated colors: Harvest Cedar, Redwood and Walnut
- Capped on 4 sides
- Product dimensions- .93" x 5.375"
- Product lengths 12', 16' and 20'

- Available in grooved or square edge
- Profile accepts current hidden fastener technology
- Natures Composites uses no toxic additives or chemicals in its manufacturing process
- BioPreferred USDA Certified BioBased Product
- Green Spec Listed
- LEED Points
- **25 Year Limited Residential Fade and Stain Warranty**

Harvest Cedar

Redwood

Walnut

Natures Composites Sets New Gold Standard for Environmentally-Friendly Decking and Fencing

The first company to invent, manufacture and distribute revolutionary exterior products made from wheat straw and recycled plastics...

Eco-friendly Products Utilizing Recycled Plastics

Natures Composites utilizes recycled plastics rather than virgin plastics to help detour waste from filling already over-flowing landfills. Some plastics can take up to one million years to degrade in landfills making them ideal materials to use for long lasting composite deck and fence products, but undesirable to bury in the ground for land filling. Natures Composites products are fully recyclable and can be reused to produce similar or different sustainable building materials, reducing future impact on our environment.

ECO-FRIENDLY PRODUCTS

Natures Composites products are engineered to be the highest quality composite wood substitute products on the market, using a process that respects protecting the environment for future generations to come. Natures Composites continuously strives to reduce and minimize the carbon footprint associated with manufacturing its composite building materials.

LOW MAINTENANCE. NO PAINTING OR SEALING!

Our products retain their color longer and won't fade like traditional wood products. Our products also resist hard water staining better than competing products.

GREEN MATTERS

Natures Composites specializes in using recycled HDPE plastics (like milk jugs) to divert materials from being land filled and to help conserve energy since plastics require a great deal of energy to produce. Natures Composites also uses wheat straw as a superior form of cellulose rather than wood for its natural fiber. Agri-fiber is annually produced whereas trees require decades to harvest and harvesting forests are known to adversely impact ecosystems.

Our products are the **greenest and most eco-friendly** building materials on the market today. High performance and sustainable products you can trust.
